reasons for choosing health & beauty

to differentiate yourself from the competition. Health & Beauty is more than a \$12 Billion domestic industry that has had little to no exposure in the premium & incentive market

to protect your bottom line. Health & Beauty products maintain their value at retail and provide excellent profit margins

Health & Beauty products let the recipients know that the company that gave it to them cares about them and their distinctive tastes

to increase redemptions/reorders. unlike other products in the premium market (TV's, home theater, etc.), health & beauty items need to be replenished multiple times a year

CRABTREE & EVELYN®
